# Annual Listing of Federally Obligated Projects

## Introduction

The Indianapolis Metropolitan Planning Organization (MPO) is responsible for regional transportation planning in the Indianapolis urbanized area, as defined by the 2010 Census, as well as the area projected to be urbanized by the year 2030. Figure 1 shows the current Indianapolis urbanized area with lighter shading, and the projected urbanized area with a darker shade. Together these areas create the Metropolitan Planning Area (MPA), which contains all of Marion County and portions of the surrounding counties of Hamilton, Hancock, Shelby, Johnson, Morgan, Hendricks and Boone.

**Figure 1: Indianapolis MPA**

### Players in the Planning Process

The MPO is charged with providing a continuing, comprehensive and cooperative transportation planning process for expenditure of state and federal funds within the MPA. The planning process is carried out through coordination between the MPO and their Technical and Policy Committees, known together as the Indianapolis Regional Transportation Council (IRTC). The IRTC includes representatives from all eligible local governments, the Indiana Department of Transportation (INDOT), and other transportation agencies such as IndyGo and the Indianapolis Airport Authority. The Technical Committee consists of planners and engineers from local governments and public agencies within the MPA while the Policy Committee consists of the elected and appointed officials from the same agencies. The IRTC Policy Committee serves as the policy-making body for the MPO and is responsible for officially adopting all plans.

### About This Report

This report serves as an organizational monitoring tool and works in coordination with the Indianapolis Regional Transportation Improvement Program (IRTIP) to promote planning for an efficient and cohesive transportation system. In creating these reports, the Indianapolis MPO collaborates with other state and local organizations, including INDOT, the Indianapolis Public Transportation Corporation, and the IRTC. The 4-year IRTIP lists the type and location for all federally funded and regionally significant transportation projects scheduled over the four-year period, as well as their funding sources.

Since there is potential for slight variations in the IRTIP due to changes in cost and timing of projects, one requirement of the transportation act passed by Congress in 2005 titled the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), is, "...an Annual Listing of Projects, including investments in pedestrian walkways and bicycle transportation facilities, for which Federal funds that have been obligated in the preceding year shall be published or otherwise made available by the cooperative effort of the State, transit operator, and Metropolitan Planning Organization for public review. The listing shall be consistent with the funding categories identified in each metropolitan Transportation Improvement Program (TIP)."

In accordance with Federal requirements, the MPO has published its "Annual Listing of Federally Obligated Transportation Projects" for state fiscal year 2015 (July 1, 2014 – June 30, 2015) based on information provided by INDOT. The purpose of this report is to provide to the public, as well as State and local officials, information regarding federal spending on transportation projects within the Indianapolis region, along with a progress report and disclosure of project delivery occurring over a shorter planning period of only one year.

If a project is "Federally obligated," it means that the Federal government has made a legal commitment to pay or reimburse the state and/or local jurisdictions for the Federal share of a project's eligible costs. The normal split for Federal and local funds contributed to transportation projects is 80% Federal and 20% local. For transit projects, obligation occurs when the FTA (Federal Transit Administration) awards a grant to the eligible recipient. For FHWA, funds become obligated to a project about five weeks following a project being deemed "ready for contracts"—a determination made by INDOT. Obligated projects were not necessarily initiated or completed in the fiscal year shown and the costs shown are not

## Annual Listing of Federally Obligated Projects

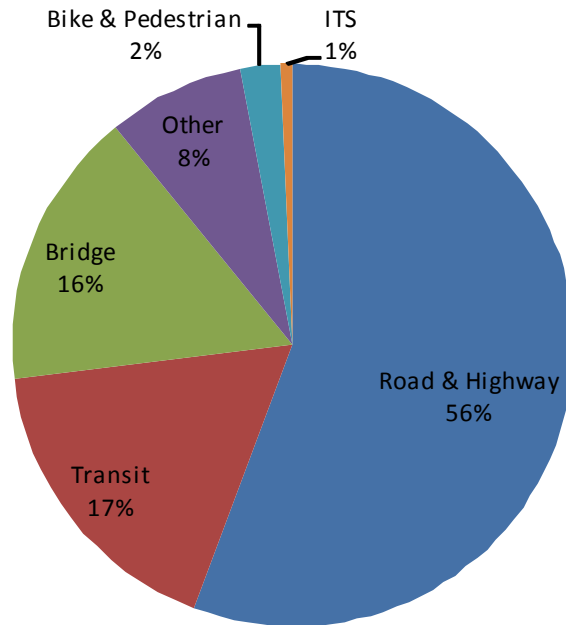

necessarily the final project cost. It is noted that obligated funds may exceed the amount programmed in the IRTIP.

### Summary of Obligated Projects

The projects contained in this report have been provided by INDOT and are categorized by type, and include bicycle/pedestrian, bridge, intelligent transportation system (ITS), road/highway, other, and transit. It should be noted that some projects may include more than one project type. For instance, a roadway project may include a bridge or bike or pedestrian system components even though they are not specifically identified.

This report shows that the amount of federal funds obligated in the Indianapolis area in SFY 2015 was \$282,784,338. Of the total, the amount spent on each category is displayed in Figure 2.

**Figure 2: Obligated Funds by Project Type (SFY 2015)**

### Detailed Project Information

The table on the following pages lists all of the Federal Highway funds and Federal Transit grants obligated in State Fiscal Year 2015, per data provided by INDOT on July 22, 2015. The table is grouped by project type, then sorted alphabetically by county (if designated), then by des. number, and the total amount of obligated funds is provided at the end of each project type listing.
